

## **IMT1 – Assessment and Treatment Strategies**

Many therapists feel frustrated and burnt out by inconsistent patient outcomes and working too hard for low returns. This 2 day course fast tracks therapists on a path to improved results and income with systematic assessments and easier techniques. Learn subjective and objective scan exams to quickly identify dysfunctions within the musculoskeletal, visceral and neurocranial systems. Follow clinical reasoning paradigms, case studies and patient demonstrations to determine where to start. Includes an introduction to counterstrain with over two dozen of the most powerful techniques taught throughout the series.

### **IMT 1 Course Schedule**

#### **Day 1**

8.30am - 9.00am	Course registration
9.00am - 10.30am	Course Introduction and Key concepts
